DIGITAL INFORMATION TECHNOLOGY

The UK has positioned itself to be the 'Digital capital of Europe' as it continues to invest billions every year in digital skills and commerce. The modern world expects digital skills to be as important as English and maths. Having both technical skills and business understanding

Key Course Information

Assessment

Coursework and Exam
Continuous assessment

Digital Information Technology is for learners who want to acquire sector-specific applied knowledge and skills through vocational contexts by studying project planning, data management, as part of their Key Stage 5 learning.
The non exam internal assessment for these components has been designed to demonstrate application of the knowledge underpinning the sector through realistic tasks and activities. The external assessment is based on key tasks that require learners to demonstrate that they can identify and use effectively an appropriate selection of skills.

Subject Combinations

Connected L2 courses

Digital Information Technology develops a range of analytical and practical skills, meaning it pairs well with a wide range of other subjects.

When studying for a 'BTEC', learners can use the knowledge and skills from GCSEs, giving them the opportunity to apply their academic knowledge to everyday and work contexts.

The course combines well with the GCSE courses English Language, Maths and Science

Progression

Where can Digital Information Technology take me?

Digital Information Technology develops transferable skills such as: analysis, problem solving, visual communication and organisational skills.

This course can lead to a wide range of Level 3 courses in IT, Digital Content Production and Business.

Through a combination of practical experience and written assignments, these vocational qualifications provide level 2 learners with the knowledge, skills and understanding needed for a career in many sectors.
