## Exploring the Future at STEAM 2025

This week, NIA6 students had the exciting opportunity to visit the University of Northampton for the STEAM 2025 event! The day was filled with interactive and engaging workshops designed to spark curiosity in science, technology, engineering, arts, and mathematics. Students from primary to sixth form came together to explore activities, creative projects, and future career ideas. It was fantastic to see our students inspired and engaged. A huge thank you to UON for hosting this event!

"The trip was exciting and fascinating as there were a variety of workshops to go to. Although most were targeted to younger year groups, it was lovely to see their interests spark in science subjects! Overall it was an intriguing day out to UON." – Maryam

## Student Life at NIA6: More Than Just Study

At NIA6, we believe a great sixth form experience includes both academic success and a supportive environment. We're always looking for ways to make our space a welcoming area where students can relax, recharge, and express themselves.

Recently, we've added a table tennis setup, giving students a fun way to unwind between study sessions. Whether it's a quick rally or a bit of friendly competition

We also love seeing our students take a moment for creativity. The piano in the common room is a peaceful favourite, offering space for musical expression.

## Student Spotlights

Hi, my name is Nadia Mohamed

I study health and social care and applied science, and I would like to study at Leicester University.

Hi, my name is Safaa Salim

I study health and social care, as well as level 3 applied science. In the future, I aspire to study a mental health nursing degree at City, University of London.

## Hidden Gem: Anki

Need a better way to retain what you're learning? Check out Anki, a flashcard app that uses spaced repetition to help you memorise facts more effectively.

From key terms and formulas to exam questions, Anki helps you create custom flashcards or use already made decks tailored to your subjects. It's perfect for quick revision sessions on the go and syncs across all your devices.

Anki isn't just for memorisation, it helps you build strong, lasting knowledge in a focused and efficient way. Try it out and level up your revision strategy.
